SUMMARY

Computer Engineering graduates (GPA 3.90/4.0) with 1+ year of professional web development across two roles held part-time, concurrent with full-time study shipping production apps with Next.js, React, Laravel, and Python. Uses Claude Code every day as the primary AI coding assistant for feature development, debugging, refactoring, and code review.

ACADEMIC

INDONESIAN UNIVERSITY OF EDUCATION

B.S. in Computer Engineering

GPA: 3.90 / 4.0

Relevant Coursework: Artificial Intelligence, Intelligent Systems & Automation, Probabilistic Robotics, Data Structures & Algorithms, Software Engineering, Mobile Programming, Web Programming, Object-Oriented Programming, Database Systems, Operating Systems, Linear Algebra, Probability & Statistics.

Bandung, Indonesia

Sep 2022 – July 2026

PROFESSIONAL EXPERIENCE

NATIONAL RESEARCH AND INNOVATION AGENCY (BRIN)

Researcher

Feb 2026 - Present (part-time, concurrent with studies)

- Researching NLP methods to semantically match academic curriculum text with job-market requirements (project CareerSync), under faculty research supervision.
- Built the data pipeline end to end, web-scraped JobStreet postings into a custom dataset, preprocessed curricular and job-requirement text, and annotated data pairs using the Gemini API.
- Reviewed state-of-the-art NLP literature and fine-tuned transformer models on the paired dataset, then deployed the trained model as a REST API.
- Developed a web application to serve the model and reported progress to the research team weekly.
- Used Claude Code daily to build and debug the scraping/preprocessing pipeline and to draft and refactor the model-serving REST API.

Bandung, Indonesia

CRESCENTRATING (Remote)

Web Programmer

Sep 2025 - Feb 2026 (part-time, concurrent with studies)

- Revamped the company website with the team using Next.js, modernizing its interface and user experience.
- Built an OCR + LLM pipeline that extracts contact details from business-card images and writes structured records to Google Sheets via the Google API.
- Developed “Gastronomy Awards,” a Progressive Web App for a restaurant competition serving event organizers, evaluators, and admins, using Next.js and Firebase.
- Paired with Claude Code daily across these projects — scaffolding React/Next.js components, debugging API integrations, and reviewing diffs before every pull request.

80 Changi Road, Singapore

PROJECTS (full list [here](#))

EIRENE

AI & Mobile Developer and Researcher

Aug 2025 – Nov 2025

- Built an AI-powered mental-health mobile app that helps users reduce TikTok addiction, pairing the DASS-21 psychological assessment with usage monitoring for data collection.
- Developed a Retrieval-Augmented Generation (RAG) chatbot that answers users’ questions about their mental state.
- Built with Flutter, Flask, and Firebase. Awarded Bronze Medal at PIMNAS 2025, Indonesia’s largest national student research competition.

VELORA

Team Lead & Full-Stack Developer

Sep 2024 - Oct 2024

- Led a team to a 1st-place win for Software Engineering excellence (among 10+ projects, UPI TEKKOM Dies Natalis 2025) with a full-stack skincare-analysis web app.
- Built a Laravel REST API (routing, controllers, authentication middleware) over a normalized MySQL schema for users, skin-analysis results, and product recommendations.
- Integrated a machine-learning model through API endpoints handling image uploads and JSON responses, with end-to-end file validation and error handling.

SKINSENSEAI

AI Engineer

Aug 2024 - Sep 2024

- Trained a YOLO model to detect skin conditions from user-uploaded images as the AI backend for a healthcare diagnostic mobile app.

- Built a Flask REST API handling image uploads and returning diagnosis results to a Flutter client. Awarded 3rd place nationally (AI-NOVAC, among 20+ teams).
- CLIPD

Jan 2026 - Current
- Personal Project
- Building a browser extension for organizing research bookmarks, using Next.js, JavaScript, and Supabase (in active development).

RESEARCH PAPERS

1. [ITI], 2024] *The Possibility Prediction of Inheriting Blood Types in Parents Based on The Child's Allele Combination* [\[link\]](#)
Reyhan Mochamad Fabian, Afrizal Adi Nugroho, Aidha Salsa Billa, Munawir Munawir, Muhammad Taufik Dwi Putra.
2. [JDDAT, 2025] *Locker Rental Pricing System Using Mamdani Fuzzy Logic* [\[link\]](#)
Reyhan Mochamad Fabian, Firda Rosela Sundari, Anugrah Adiwilaga.
3. [Processor, 2026] *Implementation of Steganography Encryption and Decryption Methods on Digital Images in Web-Based Applications* [\[link\]](#)
Reyhan Mochamad Fabian, Yosua Adriel Tamba, Muhammad Rifki Lathif, Muhammad Rafi Pasya Martadisastra, Salsabila Nida Azzahra, Deden Pradeka, Zahra Khaerunnisa.
4. [Widina Media Utama, 2025] *Operating System and Its Implementation* [\[link\]](#)
Muhammad Taufik Dwi Putra, Munawir Munawir, Zahra Khaerunnisa, **Reyhan Mochamad Fabian**

LEADERSHIP

- NOVOCLUP AT PARAGON

Bandung, Indonesia
- Event Coordinator & Master of Ceremony
- Nov 2022 - Aug 2023
- Organized and hosted multiple campus events as MC and co-Person-in-Charge for 100+ participants, coordinating agendas and managing event flow for smooth execution.

TECHNICAL SKILLS

Technologies: C++, Java, Python, Flutter, Django, JavaScript, HTML, CSS, React, NextJS, Laravel, PHP, Flask, SQL, NoSQL, Tensorflow & Keras, Git, Docker, Claude Code.

AI-Assisted Development: Claude Code, Cursor, Gemini API, prompt engineering.

Certifications & Training: Alibaba Cloud Certified Developer Generative AI, Harvard CS50x: Introduction to Computer Science, Data Scientist Expert (IDCamp), REST API Intermediate (HackerRank), Machine Learning Development (Dicoding).

Languages: English (Fluent), Indonesia (Native).

HONORS & AWARDS

- 1st Place — Best Project in Software Engineering, UPI TEKKOM Dies Natalis 2025 (Velora, among 10+ projects).
- Bronze Medal — PIMNAS 2025, Hasanuddin University (Eirene, national finals among 40,000+ teams nationwide).
- 2nd Place — IT Convert National Software Development Competition, Jember University 2024 (Eunoia, among 20+ teams).
- 3rd Place — AI-NOVAC National AI Innovation Competition, Institut Teknologi Sumatera 2024 (SkinSenseAI, among 20+ teams).
- Rank 39 / 100 — Indonesia Young Coders League 2025 (Mekari).
- Participant — AI for Impact APAC Hackathon 2024 (Hack2skill).
